

DigIn – Digitalisation and Inclusive Education: Leaving No One Behind in the Digital Era

Our Teacher Training (MOOC) Is Online!

We're excited to announce that the DigIn MOOC started on September 1, 2022.

This MOOC has five units:

1. Basics of "Universal Design for Learning"
2. Accessibility and Usability
3. Assistive Technologies
4. Digital Technology for Inclusive Education
5. Socially Embedded Learning (online)

With the MOOC, you can strengthen your skills in the field of digital inclusive education and get prepared to teach students with disabilities in the digital age.

How the MOOC Works

From September 1 to 29, we will be unlocking a unit each week. After this, the units are all freely accessible until January 2023. Once all of the units are unlocked, you can work on them at your own pace.

Each unit has **subtitled videos**, video transcripts, PowerPoints, different activities, and reflection points. You can share your ideas and experiences with other participants in a **forum**. To complete each unit, you have to pass a **quiz**.

What Languages Are Available

Whether you speak **English, German, Italian, Bosnian, Croatian, or Macedonian** we have an accessible MOOC for you.

How to Access the MOOC

Visit the [iMooX website](https://imoox.at/mooc/login/index.php) and **register** for the **DigIn MOOC** for free.

Looking Back on the First Year

It's only been a year but we've already had international exposure for the DigIn project.

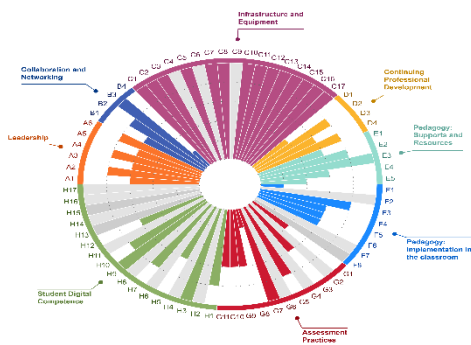

Second Project Meeting in Sarajevo

After one year we finally met in person. The second transnational project meeting took place in Sarajevo, Bosnia and Herzegovina, on April 11 and 12, 2022. DUGA organized the successful meeting.

During these two days, our working space was the historic Hotel Holiday. In this iconic landmark, we discussed how the project was being implemented and had a chance to get to know each other better.

Successful SELFIE Studies

In the last year 21 schools from the four project countries participated in SELFIE.

With this tool, we analyzed the views of students, teachers, and school leaders about the digital potential and inclusive practices in their schools.

ECER 2022

We presented the project at ECER – European Conference on Educational Research – in Yerevan, Armenia, which gave DigIn its first international spotlight. We generated lots of interest from academics around the world.

ECER is one of the largest annual educational research conferences in Europe. Each year around 3000 participants from more than 70 countries present at ECER.
